SYNTHA

Synthetic Intelligence Protocol

Version 1.0 — November 2025

Abstract

SYNTHA (SYN) unites Artificial Intelligence and Web3 through a transparent BEP-20 protocol on BNB Smart Chain. It powers neural utilities, developer tools, and decentralized AI orchestration systems.

Vision & Mission

Our mission is to bring neural computation to decentralized environments, enabling developers and communities to access, build and scale AI-driven solutions within a secure and transparent ecosystem.

Technology

SYNTHA leverages BNB Smart Chain to integrate neural utilities, providing token-based access to AI resources. Each transaction and on-chain event contributes to a growing dataset of decentralized intelligence. The SYN token acts as both utility and governance medium for AI agents.

Tokenomics

Token Name	SYNTHA
Symbol	SYN
Standard	BEP-20 (BNB Smart Chain)
Total Supply	10,000,000 SYN
Decimals	18
Utility	Access to AI Tools, Governance, Treasury participation

Roadmap

- Q4 2025 — Token deployment, PancakeSwap listing, ecosystem launch
- Q1 2026 — Developer SDK release and AI toolkit

- **Q2 2026 — Treasury dashboard and staking**
- **Q3 2026 — Governance and AI Agent marketplace**

Market & Ecosystem

SYNTHA is built to integrate seamlessly with DEXs, Web3 wallets, and AI-centric DeFi platforms. It represents the convergence of neural processing and blockchain transparency — forming a foundation for future decentralized intelligence protocols.

Disclaimer

This document does not constitute financial advice or a solicitation to invest. The SYN token is a digital asset subject to market volatility. Users should conduct their own research and understand associated risks before any transaction.
